

iPAD & TABLET

SECURITY & CHARGING SOLUTIONS

Loxit design and manufacture charging, security and management solutions for tablets.

Over the past 20 years we have collaborated with many of our customers and technology partners to perfect solutions for everything from iPads and laptops to touch screens and interactive whiteboards.

Today Loxit is recognised around the world as a leading light in the delivery of innovative solutions for the storage, security, charging and data transfer for mobile devices.

A reputation based on...quality products, made to our exacting standards, and high levels of service...having designed, developed and manufactured every product we sell, we know our equipment inside-out, back to front and strive to achieve exceptional levels of service and aftercare for all customers.

TABCART

SECURITY & MANAGEMENT

TabCart is a range of mobile storage solutions packed full of features that is specially designed for the management of multiple tablets and iPads. The unique Loxit design combines weight saving technology with years of engineering expertise to create:-

- a steel construction that is durable, lightweight and secure, allowing it to be moved with little effort.
- easy access to the tablets from above (at the perfect height) increasing usability and making it suitable for all.
- flexible storage for any device measuring up to 260mm wide x 300mm high x 28mm thick (charger point on width).
- a slimline design with small footprint for maximum efficiency.

THE TABCART COMES IN 3 OPTIONS

Integrated USB charger using your own USB charging cables.

Integrated charging power strips using your own adapters and charging cables.

Integrated USB Sync & Charge using your own USB charging cables.

Universal USB Sync & Charge with cutting edge technology to sync each device. This ensures optimum speed and safe charging no matter which device is being used. Free updates ensure future compatibility.

Smart design - small footprint and strong but lightweight design includes numerous features including rounded corners to protect door frames and walls.

Lockable - the separate lockable charging compartment means user access can be restricted to the tablet compartment only.

Strength built in - the welded steel construction with full length piano hinges provides a durable solution.

Easy wheel - designed to last, the TabCart uses large diameter, individually locking wheels.

External main power supply - switched and fused, safely tucked away, with a storage shelf.

External ethernet connection - allows a wireless access point to be integrated and stored within the unit to provide a perfect wireless connection. (Wireless access point sold separately).

TABCART

SECURITY & MANAGEMENT

Get connected - a single USB cable connects all tablets to the host computer via the Sync and Charge device.

The perfect charge - when connected via USB, each tablet is profiled by the Sync & Charge device. The optimum charge rate is then delivered to each individual tablet, ensuring the fastest and safest charge rate possible.

Future proof - the USB connection also allows charging profiles to be updated as new versions of a tablet are released.

Sync up to 16 iPads or iPad mini's at once - using Apple's Configurator allowing all tablets to sync simultaneously*.

**When using an Apple host computer. Windows based computers may sync up to 7 iPads at one time.*

Dynamic chassis - the high quality, welded steel chassis is powder coated for longevity.

Four sturdy grab handles for safe transportation - one at each corner.

Secure wall docking - TabCart can be securely attached to the fabric of the building with robust docking brackets and twin 60mm brass padlocks (sold separately).

Low power consumption - the clever design incorporates natural convection ventilation to prevent heat build up inside the unit without the use of power hungry electric fans.

Flexible storage options - our unique dividers not only protect your devices, but suit varying case sizes up to 28mm thick. Custom sizing is available for even larger cases like Big Grips.

TABCART RANGE

FOR MORE DETAILS SEE OUR SPECIFICATION SHEET

LAPBANK TABLET TROLLEY

HIGHEST SECURITY

The Lapbank Tablet Trolley range is our highest security range and benefits from years of refined engineering throughout every element of the design. We have created a truly integrated tablet security trolley.

From the fully welded, thick steel construction to the full length piano hinges and twin 7 lever safe locks that are protected by anti-jimmy bar devices. From the grab handles that provide a sure grip to the heavy duty, easy glide wheels that are rubberized for smooth motion the Lapbank Tablet Trolley combines years of Loxit security innovation, combining the cleverly designed natural ventilation, that eliminates the need for energy to power hungry cooling fans.

With USB Charge, Charge Only with transformers or Sync & Charge options, this durable, highly secure tablet trolley, is the preferred choice of anyone who values ease of management and security of tablets. There are two Lapbank Tablet Trolley designs and a range of sizes - Lapbank Tablet Trolley with Drawers and Lapbank Tablet Trolley with Shelves.

LAPBANK TABLET TROLLEY

with DRAWERS

Tablet management - optional laptop clamp safely secures a laptop to the unit for ease of management whilst syncing.

Efficient - also standard are weekend and bank holiday charge delay. Saving energy, battery life and the environment.

Intelligent - Loxit's integrated Intelligent Charging system comes as standard. This provides a simple to use, highly efficient charging system with charge status indicator and power save mode.

Visible - for absolute convenience, the Intelligent Charge switch is located on the front face of the drawer and is also visible when the door is locked shut.

Smooth operation - conveniently positioned, the slide out drawers allow easy access of the tablets.

Relax in comfort - the interior features high-density cushioned foam storage to protect devices with case sizes up to 26mm thick.

LAPBANK TABLET TROLLEY

with **SHELVES**

The Lapbank Tablet Trolley with Shelves is a universal design with storage configured for two tablets per shelf and it accommodates devices up to a maximum case size of 70mm (h) x 360mm (w) x 230mm (d).

The cushioned shelves protect and grip devices and the generous shelf gaps provide huge scope for swapping out different sized devices - future proofing and allowing for mixing a variety of products in the same trolley. The products could include tablets from different manufacturers, GPS devices, 3-D glasses, e-readers, digital cameras and smart phones etc. A spare shelf is allocated for Laptop security to complete the solution.

Our constant attention to detail and exacting build quality means the range has established a no-nonsense reputation for security. Lapbank Trolleys are particularly suited in open access environments where security may be an issue.

FRONT LOADING

REAR CHARGING

Shelf life - the wide shelves allow 2 devices on each shelf and its height means no worries about case sizes.

Serious security - market leading security measures to protect your assets.

Mix 'n' match - It's not just tablets that can be charged, any USB chargeable device is compatible - tablets, phones, 3-D glasses, GPS, digital cameras, e-readers etc. Simply plug in and charge on the shelf.

The perfect charge - when each device is plugged in, the Sync & Charge device analyses its profile to deliver the exact amount of charge required for optimum full rate charging. Protecting your device and the battery.
NOTE - Sync and data transfer compatibility where applicable.

iPORTA

RUGGED PORTABILITY

iPorta is the ideal solution for safely transporting multiple iPads and tablets in a self contained portable work station. And because iPorta also fits in most vehicles, off-site resource sharing can be centralised and secure for peace of mind.

Packed full of features, the tough, rugged polypropylene case hides a cushioned, high-tech interior that features space for up to 16 x iPads, iPad minis or 7-10" tablets, in a range of case sizes up to 26mm thick. There's also space for an optional wireless access point with external CAT 5 connection, a 15.6" laptop with cable stowage and an external power supply.

IPORTA COMES IN 3 CONFIGURATIONS

| | | |
|---|---|---|
| <p>1 - USB CHARGE</p> <p>With a high powered universal USB charger, using USB charging cables.</p> | <p>2 - CHARGE</p> <p>Power bars use the original universal USB charging cables with transformers for a simple and cost effective solution.</p> | <p>3 - SYNC & CHARGE</p> <p>Includes Universal USB Sync & Charge with cutting edge technology to sync each device. This ensures optimum speed and safe charging no matter which device is being used. Free updates ensure compatibility.</p> |
|---|---|---|

Power up - the charge only option has integrated power strips allowing users to charge their devices using the original cables and adapters. Country specific charging available.

Expand your network - the WAP compartment provides space to mount a wireless access point inside the iPorta. An external CAT 5 connection plugs into the LAN, expanding the wireless.

Expand or contract - movable divider allows various tablet sizes to be accommodated. The fine tolerance settings mean a perfect fit for whichever tablet size you choose - from 7 - 10".

iPORTA CHARGE

Breath easy - the highly ventilated design coupled with external power and ethernet connections means you can charge with the lid closed.

All-in-one - the laptop storage compartment comfortably stores 15.6" laptops, enabling the iPorta to contain everything needed for an efficient mobile workplace.

Serious comfort - the interior features quality high-density cushioned foam storage providing excellent protection for devices. Store up to 16 devices in case sizes up to 26mm thick.

FOR MORE DETAILS SEE OUR SPECIFICATION SHEET

Smart design - a specially designed ventilation system allows the iPorta lid to remain closed whilst your devices are charging.

Double combination pad-locks - an optional feature that ensures total peace of mind when charging with the lid closed.

Power up - switched and fused external power socket allowing charging with the lid closed. (3m power cable provided.)

Get connected - integrate a wireless access point and hook into the LAN with an external ethernet connection.

Mobility - iPorta features roller wheels and an extendable carry handle to make the unit really maneuverable and smooth to transport.

FOR MORE DETAILS SEE THE WEBSITE - www.loxit.com

iBANK WEDGE

DESKTOP ACCESS

Ergonomically designed for desk or countertop solutions, the iBank Wedge provides cushioned storage for up to 8 iPads or tablets from 7-10" including a range of case sizes from slimline up to 26mm thick, including products such as the Griffin Survivor.

Security includes an all welded steel construction with full-length piano hinges to the door and a cam-lock on the door itself. The unique wedge shape also features natural ventilation designed into the structure of the case. This prevents heat build up inside the unit.

The iBank is a real box of tricks with ergonomic tablet loading, smart cable management and integration of cutting edge technology with professional grade Sync & Charge options.

The perfect charge - each device's charging profile is perfectly delivered, ensuring optimum charging across the board via USB. Charge Only version available using plug in transformers.

Small and perfectly formed - minimal footprint for desk or counter top applications.

Cool design - the angled wedge design provides ergonomic operation for easy access to tablets whilst ventilating naturally to prevent heat build up.

Control - simply connect your host computer to the sync and charge device to connect to all 8 tablets at once.

Hard wired data connection - for up to 8 iPads and/or tablets ranging from 7-10 inch in cases up to 26mm thick.

| | USB CHARGE | CHARGE | SYNC & CHARGE |
|---|------------|--------|---------------|
| 8 | 7709 | 7710 | 7711 |

FOR MORE DETAILS SEE OUR SPECIFICATION SHEET

iBANK 45 & 60

HIGH SECURITY WALL & DESKTOP

Incredibly compact secure storage for 45 or 60 tablets. Mix and match devices using USB Charge *OR* USB Sync & Charge options. That's a lot of tablets, and a lot of cables, so we've built in user-friendly cable management.

Charge compartment - separate rear lockable charging compartment keeps fingers away from cables.

Two door access, one either side, for ease of installation.

Locked - twin 7 lever safe locks with anti-jemmy bar design on the doors, for our highest level of security.

Charge Only - options include charging using the device's own transformers.

Controlling the heat - the design of the unit has built-in ventilation, allowing air to circulate, even with the doors closed, preventing damage to the tablets.

Safe and secure - the unit is securely attached into the infrastructure of the building using 10mm bolts.

FOR MORE DETAILS SEE OUR SPECIFICATION SHEET

TABINET 10

SLIMLINE WALL STORAGE

Size matters - the Tabinet™ is just 890mm high, 450mm wide and only 220mm deep. That is an incredibly efficient storage space, perfect for corridors, smaller offices and huddle areas.

The design accommodates 10 tablets complete with fully managed charging, so every product (regardless of manufacturer or model) receives the perfect charging profile.

There's also plenty of in-built ventilation, allowing air to circulate around the devices, ensuring that there is no heat build-up within the cabinet itself.

Charge or Sync and Charge - a range of options for the storage and management of devices.

Charge and Data transfer - options include:-
 > **Universal USB charging**
 > **Charge Only using adapters**
 > **Sync & Charge** - high speed, simultaneous data transfer and charging

Slimline - unobtrusive, even with the door fully open.

Quick key less access - 10 digit keypad lock.

Easy product access - the tablets are conveniently stored within a series of smooth touch, ergonomic dividers.

Versatile mounting - wall or desktop.

Colour and Branding - available in a number of colour combinations, the door panel can be configured to display your brand colours and logo if required.

STAND ALONE SYNC & CHARGE

The Loxit 'stand alone' range enables all the great functions of our products in small, adaptable units that you can integrate into your existing security and charging systems.

The range covers everything from simple multi point charging units to remote Sync & Charge management across an entire campus. There's something for everyone, depending on what you need, the space that you've got and the level of technology you require...

-  **CHARGE >**
Professional, specific output volumes to ensure the right amount of power is supplied to each device.
-  **INTELLIGENT CHARGE >**
Integrated power saving complete with charge status indicators, improves battery life and saves the environment.
-  **SYNC >**
Significant time savings, connecting your host computer to all your devices at once via a USB cable.

SERIES 8 UNIVERSAL USB CHARGER

An aluminum constructed premium intelligent 8-port USB charge station is as suitable for the boardroom as it is the lounge. The Series 8 delivers full rate charging for a mix of devices including iPads, iPad minis, Nexus, Galaxy tab, iPhones and iPods, Kindles, e-readers, digital cameras, 3-D glasses and GPS...basically any USB chargeable device.

Future proof - using micro USB connections allows the charging profiles to be updated as new versions of a tablet are released.

Interactive LED display - charge display options for all connected devices including party mode.

SERIES 8 UNIVERSAL USB CHARGE
PRODUCT CODE 7870

Charge multiple USB devices through one product - charge up to 8 devices including iPads, iPad minis, tablets, cameras, GPS etc.

Compatible with any device that requires charging via USB cable.

Each device's charging profile is perfectly delivered, ensuring optimum charging across the board via USB.

FOR MORE DETAILS SEE OUR SPECIFICATION SHEET

TAB RACK 5 UNIVERSAL CHARGE STATION

This is an incredibly neat way of charging a whole host of devices. The simple, stylish design of the Tab Rack hides a host of features that allow you to store and charge pretty much anything...including plugged in laptops.

When it's USB charging that you need, there's sync and charge for up to 5 devices using smart charge technology to deliver the optimum charge to each device...whatever it is...a phone...a camera...anything with USB can be charged and the built-in rack slots allow you to neatly store the devices whilst charging. Now comes the best bit, if you have laptops or other larger devices that require a mains input to charge, the Tab Rack can accommodate them too, thanks to two mains in (UK, US, Europe and Australia) plug ports that are on the reverse. All these charging options packed into a small, discreet unit that only requires one mains input.

One in, many out - from one mains feed you can charge 5 devices via USB, confident that the internal PSU will provide the full and accurate rate of charging for each device. You can also charge 2 mains input devices from the rear of the unit.

Store and charge - each device has it's own storage slot (20mm wide) perfect for phone, cameras and tablets, the neat slots reduce clutter.

Mains charging for bigger devices - the unit has two mains inputs, allowing you to charge two laptops and 5 USB devices simultaneously. Perfect for the home or the boardroom.

Universal traveller - the unit is compatible with UK, US, European and Australian mains input, making it the ideal traveling companion.

Small but perfectly formed - the Tab Rack is just 160 x 130 x 90 mm, making it unobtrusive when in use...on your desk, in the boardroom or at home. Plus...it won't take up all your luggage space when travelling.

Quality control - the Tab Rack is fully CE and UL certified for your complete peace of mind.

 **TAB RACK 5 UNIVERSAL CHARGE STATION**
PRODUCT CODE 7905

10 PORT UNIVERSAL USB CHARGING STATION

Owning and managing multiple devices can become a messy business. There are so many chargers and never enough plug sockets. Cables become tangled and life can get cluttered pretty quickly. Now you can instantly declutter your home, office or retail display with just one stylish, small, neat, high powered charger that allows a mixture of devices to be charged all at the same time.

How many times have you gone to check how your device is charging only to find it has been unplugged and someone else is using the plug socket? Not any more, with the 10 Port Universal Charging Station you can charge a mix of devices and even sync devices with data transfer.

High capacity - the built in PSU provides the full and accurate rate of charging for up to 10 devices. Compatible with any device that charges via USB cable.

Professional equipment - fully CE and UL certified.

The perfect charge - each device's charging profile is perfectly delivered, ensuring optimum charging across the board via USB.

**10 PORT
UNIVERSAL USB CHARGE**
PRODUCT CODE 7910

Data transfers - 4 ports for sync data, such as syncing iPads or iPhones with Apple iTunes or photos from digital cameras etc.

Flexible charging - compatible with Amazon Kindle eBook readers (Fire and Black+White). Also powers up to 8 Raspberry Pi or tablets for classroom use.

Multi sync management - 4 ports allow for easy sync of data - e.g syncing iPads with Apple iTunes* or photos from cameras.

**Please note, Apple computers operating iTunes will sync up to 30 iPads or other Apple products simultaneously. PC's operating Windows software, iTunes will sync up to 7 Apple products simultaneously.*

FOR MORE DETAILS SEE OUR SPECIFICATION SHEET

POWER PAD

This small unit is perfect for desktop or under counter applications. The PowerPad range has a separate transformer allowing for a discrete installation. Don't be fooled by it's size, this high powered USB Sync and Charge device really packs a punch with constant, full rate charging at a genuine 2.1A per port.

Available in a number of sizes and options including charge only Apple products, Universal Charge Only, or Sync and Charge.

Multi sync management - when connected to the host computer sync and manage 15 devices* simultaneously. Set-up is quick and easy, via USB cable to host computer.

Small form - with a separate transformer the Power Pad range can be mounted discretely. The mount holes provide a firm fixing in your most convenient location - under desk, on top of counter, wall mounted etc.

Future proof - updatable firmware administered through the host computer port.

Simply connect to the web for free updates. Ensuring your investment performs for years to come.

The perfect charge - each device's charging profile is perfectly delivered, ensuring optimum charging across the board via USB.

That's a constant, full rate of 2.1A per individual port, all of the time.

**Please note, Apple computers operating iTunes will sync up to 30 iPads or other Apple products simultaneously. PC's operating Windows software, iTunes will sync up to 7 Apple products simultaneously.*

ETHERSYNC RANGE

Imagine being able to roll out profiles to all the iPads across your building from one remote location, all done at the same time...for up to 42 iPads! Imagine updating sales catalogues across all the Sales Assistant's iPads in different stores from the comfort of your own office.

Now you can. EtherSync is a USB charge and sync device that not only charges and syncs the USB devices, but also allows them to connect to any ethernet network. It also allows your existing Cambrionix sync and charge product to connect all devices to the ethernet. EtherSync is available with 2, 4 or 8 ports, so if you already have existing Cambrionix sync and charge products, these may be connected to the LAN in-line via the EtherSync.

Through the EtherSync software, your remote USB devices appear on your computer, in the same way that they would if they were local to that machine, even though it might be in a different building, city or country. Using Ethersync in one central location saves time in visiting each room to perform OS or security updates, or to change content stored within each device. EtherSync works brilliantly anywhere there are multiple devices that need regular maintenance. Reducing costs and time by managing the devices remotely.

EtherSync supports Gigabit Ethernet and offers two Ethernet ports - one for your Ethernet connection and one to daisychain additional EtherSync devices if necessary.

Software that is compatible with existing applications - including iTunes™ and Configurator. It has no ongoing license cost. EtherSync comes with fully supported hardware and software which is 'future proof' via its upgradeable firmware. Just connect to your PC with a USB cable and download the latest software from the website.

Up to 8 USB ports - that can be accessed via standard Ethernet cabling running TCP/IP protocols.

The incredible versatility of the Hi-Lo® Mono range covers every type of screen installation...fixed or mobile, single, double or triple screen, there's a Mono solution for you. The silky smooth, electrical operation, moves even the largest screens (up to 105" or up to 170kg) by either 500 or 600mm.

Visit www.loxit.com for full details of this and all our other Screen mount products, including a downloadable brochure.

THE MAGIC CARPET INTERACTIVE FLOOR SYSTEM

What is it?

The Mobile Magic Carpet is a highly engaging product that stimulates the senses, getting people actively involved and entertained.

High brightness content is projected onto any surface, creating a fully interactive space. This could be the floor, a patient in bed, a table or wheelchair tray. Then the projected image instantly reacts to movement on the surface with cause and effect.

Where is it used?

Education - across all ages and abilities including SEN
Medical/healthcare - from physiotherapy to Dementia

“When children are relaxed and having fun, not realising they’re learning, you’ve hit the money!”

Emma Maltby, Head Teacher, St Mary the Virgin Primary

Retail, Corporate and ‘live’ events - engage people in your brand like never before

Plug and play

The Mobile Magic Carpet is a plug and play, straight out of the box solution that is simple to use and quick to set up.

Featuring 500 pre-loaded apps, and app-builder software to create your own content from the simple to use templates. The Mobile Magic Carpet can be controlled via iOS or Android on your own device, or via the wireless keyboard that is supplied.

LAPTOP SECURITY & CHARGING

Q - WHERE IS THE SAFEST PLACE TO STORE (AND CHARGE) YOUR LAPTOP?

A - LAPBANK

The Lapbank is a secure storage unit, made from high quality materials, wrapped around innovative designs to produce some of the highest quality security and charging solutions available. Exacting, strong, durable and with a sense of purpose, the Lapbank range of Laptop security and charging products has been a firm favourite with professionals worldwide for almost 21 years.

Available as both mobile trolley and fixed cabinets, all Lapbanks feature 7 lever safe locks with anti-jimmy bar devices, twin skin welded steel doors, and all welded steel

body with natural ventilation. The mobile units also offer security docking options, heavy duty grab handles and large diameter, rubberized, lockable wheels for a smooth ride. Our charging systems employ multi-layer electrical safety and fully comply with all safety standards. Visit www.loxit.com for more details and download a brochure.
