TABCART

SECURITY & MANAGEMENT

TabCart is a range of mobile storage solutions packed full of features that is specially designed for the management of multiple tablets and iPads. The unique Loxit design combines weight saving technology with years of engineering expertise to create:-

- a steel construction that is durable, lightweight and secure, allowing it to be moved with little effort.
- easy access to the tablets from above (at the perfect height) increasing usability and making it suitable for all.
- flexible storage with each compartment measuring up to 270mm wide x 300mm high x 30mm thick.
- a slimline design with small footprint for maximum efficiency.

THE TABCART COMES IN 3 OPTIONS

Integrated USB charger using your own USB charging cables.

Integrated charging power strips using your own adapters and charging cables.

Integrated USB Sync & Charge using your own USB charging cables.

Universal USB Sync & Charge with cutting edge technology to sync each device. This ensures optimum speed and safe charging no matter which device is being used. Free updates ensure future compatibility.

Smart design - small footprint and strong but lightweight design includes numerous features including rounded corners to protect door frames and walls.

Lockable - the separate lockable charging compartment means user access can be restricted to the tablet compartment only.

Strength built in - the welded steel construction with full length piano hinges provides a durable solution.

Easy wheel - designed to last, the TabCart uses large diameter, individually locking wheels.

External main power supply - switched and fused, safely tucked away, with a storage shelf.

External ethernet connection - allows a wireless access point to be integrated and stored within the unit to provide a perfect wireless connection. (Wireless access point sold separately).

TABCART

SECURITY & MANAGEMENT

Get connected - a single USB cable connects all tablets to the host computer via the Sync and Charge device.

The perfect charge - when connected via USB, each tablet is profiled by the Sync & Charge device. The optimum charge rate is then delivered to each individual tablet, ensuring the fastest and safest charge rate possible.

Four sturdy grab handles for safe transportation - one at each corner.

Future proof - the USB connection also allows charging profiles to be updated as new versions of a tablet are released.

Sync up to 16 iPads or iPad mini's at once - using Apple's Configurator allowing all tablets to sync simultaneously*.

**When using an Apple host computer. Windows based computers may sync up to 7 iPads at one time.*

Dynamic chassis - the high quality, welded steel chassis is powder coated for longevity.

Secure wall docking - TabCart can be securely attached to the fabric of the building with robust docking brackets and twin 60mm brass padlocks (sold separately).

Low power consumption - the clever design incorporates natural convection ventilation to prevent heat build up inside the unit without the use of power hungry electric fans.

Flexible storage options - our compartments are 270 H x 300 W x 30mm D accommodating most devices including cases. Custom sizing is available for even larger cases like Big Grips.

LAPBANK TABLET TROLLEY

SECURITY & MANAGEMENT

The Lapbank Tablet Trolley with Shelves is a universal design with storage configured for two tablets per shelf and it accommodates devices up to a maximum case size of 70mm H x 360mm W x 230mm D.

The cushioned shelves protect and grip devices and the generous shelf gaps provide huge scope for swapping out different sized devices - future proofing and allowing for mixing a variety of products in the same trolley. The products could include tablets from different manufacturers, GPS devices, 3-D glasses, e-readers, digital cameras and smart phones etc. A spare shelf is allocated for Laptop security to complete the solution.

Our constant attention to detail and exacting build quality means the range has established a no-nonsense reputation for security. Lapbank Trolleys are particularly suited in open access environments where security may be an issue.

FRONT LOADING

REAR CHARGING

Shelf life - the wide shelves allow 2 devices on each shelf and its height means no worries about case sizes.

Serious security - market leading security measures to protect your assets.

Mix 'n' match - It's not just tablets that can be charged, any USB chargeable device is compatible - tablets, phones, 3-D glasses, GPS, digital cameras, e-readers etc. Simply plug in and charge on the shelf.

The perfect charge - when each device is plugged in, the Sync & Charge device analyses its profile to deliver the exact amount of charge required for optimum full rate charging, protecting your device and the battery. NOTE - Sync and data transfer compatibility where applicable.

iPORTA

RUGGED PORTABILITY

iPorta is the ideal solution for safely transporting multiple iPads and tablets in a self contained portable work station. And because iPorta also fits in most vehicles, off-site resource sharing can be centralised and secure for peace of mind.

Packed full of features, the tough, rugged polypropylene case hides a cushioned, high-tech interior that features space for up to 16 x iPads, iPad minis or 7-10" tablets, in a range of case sizes up to 26mm thick. There's also space for an optional wireless access point with external CAT 5 connection, a 15.6" laptop with cable stowage and an external power supply.

iPORTA COMES IN 3 CONFIGURATIONS

 <p>Integrated USB charger using your own USB charging cables.</p>	 <p>Integrated charging power strips using your own adapters and charging cables.</p>	 <p>Integrated USB Sync & Charge using your own USB charging cables.</p>
---	--	---

Power up - the charge only option has integrated power strips allowing users to charge their devices using the original cables and adapters. Country specific charging available.

Expand your network - the WAP compartment provides space to mount a wireless access point inside the iPorta. An external CAT 5 connection plugs into the LAN, expanding the wireless.

Expand or contract - movable divider allows various tablet sizes to be accommodated. The fine tolerance settings mean a perfect fit for whichever tablet size you choose - from 7 - 10".

Get connected - integrate a wireless access point and hook into the LAN with an external ethernet connection.

iPORTA CHARGE

Breathe easy - the highly ventilated design coupled with external power and ethernet connections means you can charge with the lid closed.

All-in-one - the laptop storage compartment comfortably stores 15.6" laptops, enabling the iPorta to contain everything needed for an efficient mobile workplace.

Serious comfort - the interior features quality high-density cushioned foam storage providing excellent protection for devices. Store up to 16 devices in case sizes up to 26mm thick.

Mobility - iPorta features roller wheels and an extendable carry handle to make the unit really manoeuvrable and smooth to transport.

iPORTA

RUGGED PORTABILITY

Smart design - a specially designed ventilation system allows the iPorta lid to remain closed whilst your devices are charging.

Power up - switched and fused external power socket - allowing charging with the lid closed. (3m power cable provided.)

Double combination pad-locks - an optional feature that ensures total peace of mind when charging with the lid closed.

iBANK WEDGE

DESKTOP ACCESS

FOR MORE DETAILS AND TO EXPERIENCE THE FULL RANGE VISIT LOXIT.COM

iBANK WEDGE

DESKTOP ACCESS

Ergonomically designed for desk or countertop solutions, the iBank Wedge provides cushioned storage for up to 8 iPads or tablets from 7-10" including a range of case sizes from slimline up to 26mm thick, including products such as the Griffin Survivor.

Security includes an all welded steel construction with full-length piano hinges to the door and a cam-lock on the door itself. The unique wedge shape also features natural ventilation designed into the structure of the case. This prevents heat build up inside the unit.

The iBank is a real box of tricks with ergonomic tablet loading, smart cable management and integration of cutting edge technology with professional grade Sync & Charge options.

Cool design - the angled wedge design provides ergonomic operation for easy access to tablets whilst ventilating naturally to prevent heat build up.

The perfect charge - each device's charging profile is perfectly delivered, ensuring optimum charging across the board via USB. Charge Only version available using plug in transformers.

Small and perfectly formed - minimal footprint for desk or counter top applications.

Control - simply connect your host computer to the sync and charge device to connect to all 8 tablets at once.

Hard wired data connection - for up to 8 iPads and/or tablets ranging from 7-10 inch in cases up to 26mm thick.

LAPBANK TL - MOBILE LAPTOP STORAGE

The Lapbank TL - top loading - for easier access. This brand new unit is based on our ever popular Lapbank product range. There are 3 things that make the Lapbank TL a stand out solution.

First, it's lighter than any other Lapbank. Second, it has a smaller footprint. Third it's more manoeuvrable.

The Lapbank TL is easier to get into the smaller spaces, it's the type of thing often found in early years rooms. It requires less effort to move when fully loaded and thanks to the 4 grab handles, one at each corner, so it responds to even the lightest of touches.

The construction is robust, fabricated from 1.5mm all welded, steel sheets. Externally, the Lapbank TL looks quite different too, with a choice of vibrant colours to match your brand or interior colour scheme.

Smart design features - small footprint and strong but lightweight design includes numerous features including natural ventilation.

Lockable - the separate lockable charging compartment means user access can be restricted to the tablet compartment only.

Strength built in - the welded steel construction provides a durable solution.

The perfect charge - when each device is connected, the Sync & Charge system analyses its profile to deliver the exact amount of charge required for optimum full rate charging. Protecting your device and the battery. *NOTE* - Sync and data transfer compatibility where applicable.

Dynamic chassis - the high quality, welded steel chassis is powder coated for longevity.

Four sturdy grab handles for safe transportation - one at each corner so the trolley, responding easily to the lightest touch.

Lock and go - all 4 wheels have independant locking facility ensuring the unit stays in place at all times.

Top loading - brings the easiest access to all your tablets, all of the time.

Easy wheel - designed to last, the Lapbank TL uses new, large diameter, individually locking wheels.

STAND ALONE SYNC & CHARGE

The Loxit 'stand alone' range enables all the great functions of our products in small, adaptable units that you can integrate into your existing security and charging systems.

The range covers everything from simple multi point charging units to remote Sync & Charge management across an entire campus. There's something for everyone, depending on what you need, the space that you've got and the level of technology you require...

-  **CHARGE >**
Professional, specific output volumes to ensure the right amount of power is supplied to each device.
-  **INTELLIGENT CHARGE >**
Integrated power saving complete with charge status indicators, improves battery life and saves the environment.
-  **SYNC >**
Significant time savings, connecting your host computer to all your devices at once via a USB cable.

TAB RACK 5 UNIVERSAL CHARGE STATION

This is an incredibly neat way of charging a whole host of devices. The simple, stylish design of the Tab Rack hides a host of features that allow you to store and charge pretty much anything...including plugged in laptops.

When it's USB charging that you need, there's space for up to 5 devices using smart charge technology to deliver the optimum charge to each device...whatever it is a phone...a camera...anything with USB can be charged and the built-in rack slots allow you to neatly store the devices whilst charging. Now comes the best bit, if you have laptops or other larger devices that require a mains input to charge, the Tab Rack can accommodate them too, thanks to two mains in (UK, US, Europe and Australia) plug ports that are on the reverse. All these charging options packed into a small, discreet unit that only requires one mains input.

One in, many out - from one mains feed you can charge 5 devices via USB, confident that the internal PSU will provide the full and accurate rate of charging for each device. You can also charge 2 mains input devices from the rear of the unit.

Store and charge - each device has it's own storage slot (20mm wide) perfect for phone, cameras and tablets, the neat slots reduce clutter.

Mains charging for bigger devices - the unit has two mains inputs, allowing you to charge two laptops and 5 USB devices simultaneously. Perfect for the home or the boardroom.

Universal traveller - the unit is compatible with UK, US, European and Australian mains input, making it the ideal travelling companion.

Small but perfectly formed - the Tab Rack is just 160 x 130 x 90 mm, making it unobtrusive when in use... on your desk, in the boardroom or at home. Plus...it won't take up all your luggage space when travelling.

Quality control - the Tab Rack is fully CE and UL certified for your complete peace of mind.

 **TAB RACK 5 UNIVERSAL CHARGE STATION**
PRODUCT CODE 7905

10 PORT UNIVERSAL USB CHARGING STATION

Owning and managing multiple devices can become a messy business. There are so many chargers and never enough plug sockets. Cables become tangled and life can get cluttered pretty quickly. Now you can instantly declutter your home, office or retail display with just one stylish, small, neat, high powered charger that allows a mixture of devices to be charged all at the same time.

How many times have you gone to check how your device is charging only to find it has been unplugged and someone else is using the plug socket? Not any more, with the 10 Port Universal Charging Station you can charge a mix of devices and even sync devices with data transfer.

High capacity - the built in PSU provides the full and accurate rate of charging for up to 10 devices. Compatible with any device that charges via USB cable.

Professional equipment - fully CE and UL certified.

The perfect charge - each device's charging profile is perfectly delivered, ensuring optimum charging across the board via USB.

**10 PORT
UNIVERSAL USB CHARGE**
PRODUCT CODE 7910

Data transfers - 4 ports for sync data, such as syncing iPads or iPhones with Apple iTunes or photos from digital cameras etc.

Flexible charging - compatible with Amazon Kindle eBook readers (Fire and Black+White). Also powers up to 8 Raspberry Pi or tablets for classroom use.

Multi sync management - 4 ports allow for easy sync of data - e.g syncing iPads with Apple iTunes* or photos from cameras.

**Please note, Apple computers operating iTunes will sync up to 30 iPads or other Apple products simultaneously. PC's operating Windows software, iTunes will sync up to 7 Apple products simultaneously.*

POWER PAD

This small unit is perfect for desktop or under counter applications. The PowerPad range has a separate transformer allowing for a discrete installation. Don't be fooled by it's size, this high powered USB Sync and Charge device really packs a punch with constant, full rate charging at a genuine 2.1A per port.

Available in a number of sizes and options including charge only Apple products, Universal Charge Only, or Sync and Charge.

Multi sync management - when connected to the host computer sync and manage 15 devices* simultaneously. Set-up is quick and easy, via USB cable to host computer.

Small form - with a separate transformer the Power Pad range can be mounted discretely. The mount holes provide a firm fixing in your most convenient location - under desk, on top of counter, wall mounted etc.

Future proof - updatable firmware administered through the host computer port.

Simply connect to the web for free updates. Ensuring your investment performs for years to come.

The perfect charge - each device's charging profile is perfectly delivered, ensuring optimum charging across the board via USB.

That's a constant, full rate of 2.1A per individual port, all of the time.

**Please note, Apple computers operating iTunes will sync up to 30 iPads or other Apple products simultaneously. PC's operating Windows software, iTunes will sync up to 7 Apple products simultaneously.*

CHARGE CONNECT

A high powered professional Universal USB Sync & Charge device with data and power management options. The Charge Connect includes an integrated high powered PSU for standalone applications.

Built-in charge management features including charging indicator, timer delay and charging cut off when the devices are fully charged.

This is a serious piece of kit for users who need reliable, future proof hardware, designed to work hard.

Future proof - using micro USB connect to the host computer to download free updates of new charging profiles as they are released.

High capacity - the built in high power PSU provides full rate charging for up to 16 devices simultaneously. Compatible with any device that charges via USB cable.

The perfect charge - each device's charging profile is perfectly delivered, ensuring optimum charging across the board via USB.

Multi sync management - when connected to the host computer sync and manage 16 devices* simultaneously. Set-up is quick and easy, via USB cable to host computer.

Smart design - features high-vent grills for maximum heat dispersion and the small footprint is ideal for desktop installation.

Loxit warranty - engineered to last and thoroughly tested. We offer a full 12 month return to base warranty.

*Please note, Apple computers operating iTunes will sync up to 30 iPads or other Apple products simultaneously. PC's operating Windows software, iTunes will sync up to 7 Apple products simultaneously.

ETHERSYNC RANGE

Imagine being able to roll out profiles to all the iPads across your building from one remote location, all done at the same time...for up to 42 iPads! Imagine updating sales catalogues across all the Sales Assistant's iPads in different stores from the comfort of your own office.

Now you can. EtherSync is a USB charge and sync device that not only charges and syncs the USB devices, but also allows them to connect to any ethernet network. It also allows your existing Cambrionix sync and charge product to connect all devices to the ethernet. EtherSync is available with 2, 4 or 8 ports, so if you already have existing Cambrionix sync and charge products, these may be connected to the LAN in-line via the EtherSync.

Through the EtherSync software, your remote USB devices appear on your computer, in the same way that they would if they were local to that machine, even though it might be in a different building, city or country. Using Ethersync in one central location saves time in visiting each room to perform OS or security updates, or to change content stored within each device. EtherSync works brilliantly anywhere there are multiple devices that need regular maintenance. Reducing costs and time by managing the devices remotely.

EtherSync supports Gigabit Ethernet and offers two Ethernet ports - one for your Ethernet connection and one to daisychain additional EtherSync devices if necessary.

Software that is compatible with existing applications - including iTunes™ and Configurator. It has no ongoing licence cost. EtherSync comes with fully supported hardware and software which is 'future proof' via its upgradeable firmware. Just connect to your PC with a USB cable and download the latest software from the website.

Up to 8 USB ports - that can be accessed via standard Ethernet cabling running TCP/IP protocols.
